Vishwajeet Singh Rawat

rawatvishwajeet784@gmail.com — +91-7505579923 — linkedin.com/in/vishwajeet-rawat1 — github.com/vishurawat1

Professional Summary

Full Stack Developer and Software Engineer with experience building AI-powered web applications using React.js, Next.js, TypeScript, Node.js, MongoDB, and Firebase. Skilled in frontend development, REST API integration, authentication systems, analytics dashboards, and responsive UI architecture. Built production-grade applications integrating LLM APIs, cloud databases, and PDF generation systems. Strong understanding of Data Structures and Algorithms, OOP, DBMS, and Operating Systems with 150+ DSA problems solved.

Education

VIT Bhopal University Bhopal, India
Bachelor of Technology in Computer Science and Engineering ***(CGPA: 7.9)*** *2023 – 2027*

- Relevant Coursework: Data Structures and Algorithms, Object-Oriented Programming, DBMS, Operating Systems, Computer Networks, Web Technologies

Technical Skills

Languages: JavaScript, TypeScript, HTML5, CSS3, Python, C++, Java

Frontend: React.js, Next.js, Tailwind CSS, React Router, Framer Motion

Backend: Node.js, Express.js, REST APIs

Databases: MongoDB, Firebase Firestore

Tools: Git, GitHub, Postman, Axios, Vercel, AWS, Figma

Concepts: OOP, DBMS, Operating Systems, Computer Networks, Authentication, Responsive Design

Experience

Software Engineering Intern May 2026 – Present
DDPI Groups *Remote, India*

- Developed, tested, and deployed a robust full-stack web platform using Next.js, Node.js, Express, and MongoDB, scaling user interaction metrics by 25%.
- Engineered and optimized stateful RESTful APIs, implementing JWT-based authentication mechanisms and secure user-session architectures.
- Architected data pipelines with MongoDB, writing complex aggregation queries that reduced database response latency by approximately 15%.
- Conducted extensive end-to-end testing of core frontend modules and API endpoints using Postman, ensuring zero critical bugs prior to staging.
- Managed production deployment workflows utilizing Vercel for frontend assets and AWS infrastructure for server-side architecture with automated CI/CD pipelines.

Technical Lead 2024 – Present
Health-o-Tech Club, VIT Bhopal

- Promoted from Core Member to Technical Lead based on technical and leadership contributions
- Led a 10-member Technical team delivering platforms for registrations, onboarding, and announcements
- Reviewed and optimized 30+ pull requests focused on responsiveness, maintainability, and frontend performance
- Mentored junior developers on React.js, Git workflows, and reusable UI architecture

Core Technical Member 2023 – 2024
Health-o-Tech Club, VIT Bhopal

- Created reusable responsive UI components using React.js and Tailwind CSS across multiple club platforms
- Resolved frontend issues and improved rendering performance across multiple production releases
- Contributed to frontend development workshops attended by 50+ students at VIT Bhopal

Projects

AI Resume Analyzer 2025
Next.js, TypeScript, Firebase, Groq API, Gemini API

- Engineered an AI-powered ATS resume analyzer supporting PDF and DOCX parsing with real-time resume evaluation workflows
- Integrated Groq and Gemini APIs with automatic fallback handling for reliable AI inference across multiple resume analysis requests
- Designed interactive workflows enabling users to apply AI-generated resume improvements dynamically
- Created analytics dashboards visualizing ATS scores, keyword gaps, and section-level resume performance using Recharts
- Secured serverless API routes with rate limiting, payload validation, and Firebase-based caching for optimized API usage

Wedding Budget Estimation Platform 2025
React.js, Node.js, MongoDB, Clerk Authentication

- Architected a full-stack wedding budget platform with secure authentication and persistent cloud storage

- Designed a pricing engine supporting 15+ customizable menu configurations and real-time budget calculations
- Integrated Clerk authentication with protected Express APIs and MongoDB persistence for user-specific budget management
- Created reusable frontend components using React Hooks and Tailwind CSS, reducing duplicate UI code by approximately 30%
- Integrated PDF export workflows for downloadable budget reports and printable estimation summaries

Modern URL Shortener 2025

React.js, Node.js, Express.js, Recharts

- Engineered a URL shortening platform with analytics tracking, QR code generation, and custom aliases
- Designed click tracking pipelines capturing browser, device, and geolocation metadata for analytics visualization
- Created analytics dashboards using Recharts to visualize traffic trends and device distribution data
- Secured backend services using Express rate limiting, CORS handling, and NanoID-based URL generation

Achievements

Solved 150+ DSA problems across LeetCode and competitive programming platforms

Finalist at HackIndore 2025 for developing a municipality management dashboard

Oracle Certified Foundations Associate in Artificial Intelligence
