VISHWAJEET SINGH RAWAT

Full Stack Software Developer (SWE) | AI Engineer
rawatvishwajeet784@gmail.com | +91-7505579923 | linkedin.com/in/vishwajeet-rawat1 | github.com/vishurawat1

PROFESSIONAL SUMMARY

Full Stack Software Developer and AI Engineer with hands-on experience building and deploying scalable web applications using the MERN stack, Next.js, TypeScript, and AWS cloud infrastructure. Experienced in RESTful API design, database optimization, CI/CD pipelines, Docker-based testing, and AI-integrated systems, with a track record of improving performance and leading engineering teams to deliver high-uptime, production-grade platforms.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, C++, HTML5, CSS3, SQL
Frontend Development: React.js, Next.js, Redux, Tailwind CSS, Framer Motion, Recharts, Responsive Web Design
Backend Development: Node.js, Express.js, RESTful API Design, Microservices Architecture, Serverless Functions
AI / ML Tools: Snorkel AI (Snorkel Flow), Gemini API, Groq API, NLP-based Text Analysis, Prompt Engineering
Databases: MongoDB, Firebase Firestore, Database Indexing, Aggregation Pipelines, Data Modeling
Cloud & DevOps: AWS (EC2, VPC, S3), Vercel, Docker, CI/CD Pipelines, Containerized Deployments, Git, GitHub
Tools & Practices: Agile/Scrum, Code Review, System Design, Data Structures & Algorithms, Unit Testing, Zod Validation

PROFESSIONAL EXPERIENCE

Software Engineer Intern — Doddapaneni Group (DDPI Groups)

Jul 2026 – Present | Bangalore Rural, Karnataka, India (Remote)

- Engineered a full-stack web platform using Next.js, React.js, Node.js, Express.js, and MongoDB (MERN stack), increasing user engagement metrics by 25% through optimized application workflows.
- Reduced data endpoint latency by 15% by implementing compound indexing strategies and optimizing MongoDB aggregation pipelines for high-traffic queries.
- Managed production multi-tier infrastructure deployments using Vercel and containerized AWS EC2/VPC environments, maintaining reliable CI/CD pipelines across development and production stages.

Software Engineer Intern — Ambiguity Labs

Jun 2026 – Jul 2026 | Hyderabad, Telangana, India (Remote)

- Contributed to training data workflows for web development and cryptocurrency-focused use cases using the Snorkel AI platform for programmatic data labeling.
- Wrote and executed automated test suites within Docker containers to validate application and model behavior in a consistent, reproducible environment.
- Collaborated with the engineering team to support model training pipelines, gaining hands-on experience with containerized testing and data-centric AI/ML workflows.

PROJECTS

AI Resume Analyzer — Jan 2025

Tech Stack: Next.js, TypeScript, Firebase, Groq API, Gemini API, Zod

- Developed an AI-powered ATS resume analyzer that processed 100+ test resumes with 95% parsing accuracy using robust text extraction and NLP-based analysis.
- Built a resilient multi-model inference architecture integrating Gemini and Groq APIs with automated fallback handling and response caching for high availability.
- Secured serverless API endpoints with sliding-window rate limiting and Zod-based schema validation.

Wedding Budget Estimation Platform — Feb 2025

Tech Stack: React.js, Node.js, Express.js, MongoDB, Clerk Authentication

- Reduced UI codebase redundancy by 30% by architecting a reusable component library and decoupled custom React hooks.
- Architected a deterministic pricing engine supporting 15+ custom configurations with real-time reactive budget computation.
- Integrated secure Clerk authentication to protect private Express.js API routes backed by MongoDB clustering.

Modern URL Shortener — Mar 2025

Tech Stack: React.js, Node.js, Express.js, MongoDB, Recharts

- Engineered a microservice-driven URL shortener with NanoID-based redirection, real-time QR code generation, and a visitor-analytics pipeline visualized via interactive Recharts dashboards.

EDUCATION

Bachelor of Technology in Computer Science and Engineering — VIT Bhopal University

Aug 2023 – Jun 2027 | CGPA: 7.9

Relevant Coursework: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Cloud Architecture

LEADERSHIP & EXTRACURRICULAR ACTIVITIES

Technical Lead (formerly Technical Co-Lead) — Health-O-Tech Club, VIT Bhopal

Sep 2025 – Sep 2026

- Promoted to Technical Lead to manage a 10-member student team architecting an event management platform serving 500+ active users with 99.9% uptime maintained during peak registration loads.
- Reviewed and optimized 30+ pull requests, enforcing structured code review practices, reusable custom React hooks, and frontend performance optimizations across the codebase.
- Designed and deployed modular, responsive UI components using React.js and Tailwind CSS across multiple campus web platforms, improving consistency and development velocity.

ACHIEVEMENTS & CERTIFICATIONS

- Solved 150+ DSA problems (LeetCode & competitive programming); Oracle Certified Foundations Associate — AI.
- Finalist, HackIndore 2025 — built a municipality management tool for large-scale geographic datasets.
